

## Statement of Retraction

The editorial committee hereby retracts the following article from publication in “Journal of the Society for Remediation of Radioactive Contamination in the Environment”, based on agreement of all authors.

June 25, 2014

**Volume Reduction on All Particle Size of the Contaminated Soil: Continuous Processing Technology of Attrition, Chemical Wash under an Ambient Temperature and Pressure Condition and Magnetic Separation**

Tomoyoshi SAMATA\*, Kazuya KIKAWADA, Manabu TAKEISHI, Yoshimitsu USHIJIMA,  
Noriyuki OHNISHI, Kazuhiko HANATA, Yoshinori KUNIKIYO<sup>3</sup>, Eiichi KATO,  
Yuki NOGUCHI, Takuya YOSHIDA, and Hideyuki TOMODA

Journal of the Society for Remediation of Radioactive Contamination in the Environment,  
Vol.1, No.3, 221-226 (2013)

### Reason of retraction

The above article was published in this journal according to the appropriate peer-review process. After publication, the following inappropriate authorship has been found; a few scientists who were significantly concerned in this research were coming out from the authors' list.

All authors and the editorial committee of this journal wish to retract the above article to preserve the integrity of material published in this journal.
